

Clarity AI's best-in-class sustainability capabilities are now fully integrated in Caceis

Built-in customizable, scalable sustainability tech for your existing workflow

Powerful, scalable **AI** at the core

Powerful capabilities:

Leveraging Natural Language Processing and Machine Learning to analyze >2M data points bi-weekly, perform reliability checks and run estimation models at scale

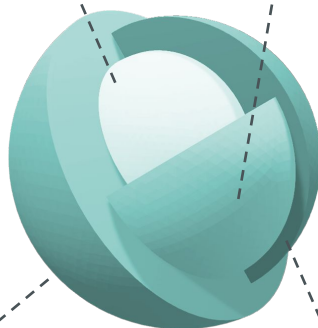

1

2

Reliable, transparent and unique **data**

Extensive and unique coverage:

2-3x more than other players, including 50,000+ companies, 300,000+ funds, 198 countries, and 188 local governments

4

3

Robust, **fully-customizable tech kit**

Scientific and evidence-based **methodologies**

Sophisticated, yet easy:

Crystal clear scores and access to full bottom-up granularity (data & methodologies)

CLARITY AI

Research & data science expertise:

Global team of sustainability and data science experts working to innovate, create, deploy and maintain tools and scores

It's very easy to see a company's alignment with technical standards"

They understood nuances that their competitors didn't even know existed"

Clarity AI's customer quotes included in "The Forrester New Wave™: ESG Ratings, Data, And Analytics, Q3 2022"

Add Clarity. Choose Sustainably™

Clarity AI sustainability capabilities in CACEIS

Efficiently navigate, analyze and report on portfolio opportunities and risks, and use integrated capabilities to comply with SFDR and EU Taxonomy

Risk

- **Industry Consensus ESG Risk:** Enables customization of insights or methodologies and comparison to internationally recognized benchmarks
- **Controversies:** Performs negative screening of investment portfolios and highlights companies to engage with to improve alignment with global norms
- **Exposure screens:** Enables screening of publicly traded companies involved in activities that may not be aligned with client or stakeholder mandates on values or beliefs

Impact

- **UN SDGs:** Quantifies the impact of a company's products, services and operations, and uses targets and metrics relevant to achieving the UN SDGs
- **ESG Impact:** Quantifies the impact of a company's operations and practices on the world, and evaluates the most pertinent ESG topics
- **Impact Highlights:** Aggregates the impact of a portfolio and compares performance to industry benchmarks and converts to real-world equivalents

Climate

- **Carbon emissions:** Evaluate scores for Scope 1, 2 and 3 emissions of reporting and non-reporting companies and metrics to report the carbon footprint of your portfolio
- **The Paris Agreement:** Investigate scores to assess company's alignment with the Paris Agreement on Climate Change (e.g., 2°C, Net Zero)
- **TCFD Alignment:** Measure companies' alignment with each of the 11 TCFD recommendations across governance, strategy, risk management, and metrics and targets

Regulatory Compliance

- **SFDR:** Including mandatory and optional PAIs for easy, accurate compliance with regulation
- **EU Taxonomy:** A 5- step tailored screener process, with full transparency in reported and estimated data

About Clarity AI

Clarity AI is a sustainability technology platform that uses machine learning and big data to deliver environmental and social insights to investors and organizations. As of August 2022, Clarity AI's platform analyzes up to 50,000 companies, 300,000 funds, 198 countries and 188 local governments, and delivers data and analytics for investing, corporate research and reporting. Clarity AI has offices in North America, Europe, and the Middle East, and its investor client network is currently managing more than USD 30 trillion in assets, representing around 25% of the assets under management globally.
